**Double Fringed Petunias**

Great strides have been made within recent years in the development of double Petunias. As the production of the seed is a matter of very careful work it consequently must be expensive. Careful handling of the seed is recommended. It is the nature of the seedlings which produce the best double blooms to be somewhat tardy during their early development. Usually they appear as if they lack vigor and their foliage appears crumpled.

**Rose-Pink and White.** We believe this is the most beautiful of all double, brilliantly colored Petunias we have ever seen. The blooms are a bright rose-pink with a broad white frill. 500 seeds $1.25; 1000 seeds $2.00.

**Rose Queen.** The double blooms measure 3 to 4 inches in diameter. They are a glorious shade of bright rose-pink. The frilling of the petals is most graceful giving the double flowers a particular charm. 500 seeds $1.25; 1000 seeds $2.00.

**Double Fringed White “Madonna.”** Perfectly double, pure white finely fringed flowers. Extra select stock. 500 seeds $1.25; 1000 seeds $2.00.

We handle only the best varieties of Gladiolus for garden and field use, forcing, and for resale to the retail trade. Our list embraces all the popular varieties for every purpose, and the prices quoted will be found right for No. 1 top-size bulbs, which is the only size we handle. The difference in price between top-size bulbs and second and third size does not justify taking the risk of having smaller blooms or such as do not bloom at all. Our bulbs are all thoroughly treated against thrips and we will send directions for thrips control with every shipment.

Six Popular Dahlias

Though every year brings us new and outstanding Dahlias there can be no doubt that some of the older kinds have not been excelled. These six have proved most dependable in various sections of the country. They have the stamina and quality that make them favorites with the public. All six varieties listed here represent free-flowering vigorous kinds with healthy constitutions. Their colors are distinct and desirable and they are offered at very nominal prices. They are leaders in the New York and Philadelphia cutflower markets.

**Galant Fox.** This New Jersey Dahlia is of outstanding merit. A perfect Formal Decorative in form with six-inch flowers of a most entrancing luminous dark red color which is described by some as claret, but defies definite description. The New York and Philadelphia markets absorb the cut-flowers as fast as they can be produced.

**Jane Cowl.** One of the most popular both in the garden and on the exhibition table. An immense Informal Decorative of very vigorous habit. The blooms combine lovely shades of bronzy buff and old gold.

**Jersey's Beauty.** Probably the most popular and most satisfactory Dahlia in commerce today. A perfect Formal Decorative of a beautiful pink color.

**Myrtle Fisher.** This slightly Informal Decorative in form, one of the most reliable for cutflower purposes that goes into the Philadelphia market. The flowers are about six inches in diameter and produced freely on sturdy healthy plants.

**Boycraft.** A Semi-Cactus Dahlia producing six to seven inch flowers in great profusion. Of a deep orange terra cotta color suffused with rose.

**Snowboy.** White Formal Decorative with perfect deep flowers, five to six inches in diameter.

We offer these in strong tubers only: $1.50 per doz.; $10.00 per 100.

**New Dwarf Dahlias for Forcing and the Garden**

This new race of which the variety "Easter Greeting", introduced last year, is the forerunner, promises to create quite a sensation.

Last season we potted up a quantity of root divisions of the different varieties in January and they were in bloom in March in 6-inch pots in such attractive condition that they would have sold in quantities if available.

Aside from their usefulness to the greenhouse man in this way they have demonstrated their adaptability for garden ornamentation this summer.

Compact plants not over two feet high and just as wide are covered with flowers from early summer until frost.

If dug in the fall and divided in early spring each division will make a fine six-inch pot plant if potted in midwinter and grown on in a moderate temperature.

**Christine.** Dauntless pure white flowers of small size. Blooms profusely.

**Hardy Perennial Plants**

_Specially Grown in Pots for Outdoor Planting_

The majority of the stock offered is pot grown. This does not mean that the plants have been altogether pot grown but that they have been field grown, dug, and potted up during the fall months. Such stock can be planted even late in the spring with practically no loss, whereas clumps seldom do well when planted late in the season. Our experience has been that a vigorous pot plant of proper size will, in nearly every case, give quicker and better results than the best so-called "field clumps."

New Dwarf Hybrid Border Asters

We highly recommend these new Dwarf Hybrid Border Asters as they fill a distinct need for a dwarf, compact, free-flowering plant that will make a showy display during the weeks just preceding the blooming of the earliest Chrysanthemums. They represent an entirely new type of Aster which probably is the most important new type of perennial plant which has been introduced for many years.

WHOLESALE LIST

**Hardy Garden Chrysanthemums**
The World’s Best Collection

2-inch pots—Ready in March

For a quarter century we have been selecting and producing new varieties of Garden Chrysanthemums, constantly endeavoring to increase their desirability and usefulness for outdoor use. As newer, better, and harder varieties appear, we are obliged to discard many old favorites. You may rest assured that the newer ones selected in the same colors have qualities of superiority justifying their trial and adoption by you. We were particularly successful in creating a fine lot of wonderfully superior varieties having Koreanum as one of the dominating strains. The increased hardiness of these has been demonstrated. In the 1936 set of ten offered below, we succeeded in producing larger flowers with a greatly enhanced range of colors. In addition, the varieties in this set bloom from one to three weeks earlier than Koreanum heretofore offered. They will have passed their prime before injury from severe frost occurs.

**New Giant Hybrid Hemerocallis**

These new Hemerocallis have been selected from the choicer varieties of recent introduction for they are a great improvement on the older types and should be in every garden. Bay State. Medium-sized round flowers of a deep pure rich yellow. Flowers early and profusely. 25c each.

Dinner This has been an outstanding unnamed seedling with us for the past three seasons. Large flowers, seven inches in diameter of the same form as Golden Dream, but larger. Mid-season. 75c each.

D. D. Wyman. Very large orange. Three large center petals overlaid most of their length with brownish yellow. Mid-season. Early. 75c each.

Gipsy. Large orange-red with broad petals. Medium height. Early. 75c each.

Gold Dust. Deep deep gold petals. Later than Golden and Sunlight. 50c each.

J. A. Crawford. Exceptionally fine flowers of splendid size. Apricot and cadmium yellow. Early June. 60c each.

Lemona. An extremely vigorous, upright growing variety producing quantities of pale lemon yellow flowers. Very early. 40c each.

Leonora. Much the same but a bit darker in color than Lemona with flowers inclined to be trumpet shaped. Mid-season. 40c each.

Young Stock in 2-inch Pots, for Growing on

The following list embraces well-tried standard varieties, as well as several of the more recent meritorious novelties.

The stock offered is of last summer’s propagation. The plants from which the cuttings were made are planted in the open field, where many of them have stood from ten to twenty years. The young stock is therefore very superior to those propagated from the blind wood 8 months older, but much more vigorous.

Goliath. This variety has gained great popularity in the vicinity of Philadelphia and in some other sections. It is a variety of great vigor producing truly immense trusses of a showy rose-pink color. $2.50 per doz.; $20.00 per 100.

Mile. Agnes Barillet. A popular early white Hydrangea. 90c per doz.; $7.00 per 100.

Mile. Rene Gaillard. A splendid early Hydrangea forming graceful large trusses composed of beautifully fringed white blooms. 90c per doz.; $7.00 per 100.

Mme. E. Moulliere. The best known of the white varieties. 90c per doz.; $7.00 per 100.

Ami Pasquier. A French introduction, fully as deep in color as Marechal Foch. A very vigorous grower blooming a week earlier than Marechal Foch. $1.50 per doz.; $10.00 per 100.

Baardse’s Favorite. A very attractive pink variety that is entitled to a fair trial. Certainly more desirable than Gen. de Vribaye, and a strong rival for Ger-trude Glahn. $1.50 per doz.; $10.00 per 100.

Deutschland. A very popular large-flowering deep rose of great vigor. $1.00 per doz.; $8.00 per 100.

Gertrude Glahn. Large trusses of dark rose florets. This variety has steadily increased in favor until it stands today as the most popular pink variety for forcing. $1.00 per doz.; $8.00 per 100.

Goliath. Tall, vigorous, large deep rose. $1.00 per doz.; $8.00 per 100.

Henri Lambert. Vigorous, very early, and a heavy grower with immense trusses of large light pink flowers. $1.00 per doz.; $8.00 per 100.

Marechal Foch. Well-formed compact plants with dark green foliage. Immense clusters of deep carmine-red flowers. Very early. $1.00 per doz.; $8.00 per 100.

Otakaa. The old reliable pink variety for all purposes. 90c per doz.; $7.00 per 100.

President Doumer. This marvelous deep red variety promises to displace several of the good sorts now popular. It blooms in midsummer and produces heavy, symmetrical flower trusses. The growth and foliage are compact yet vigorous and the plants show remarkable tendency to mature all their blooms at one time. This characteristic is of particular value. $2.00 per doz.; $15.00 per 100.

Rosabelle. This is another of the very popular sorts for which there is a great demand in the eastern market. Produces extra large showy trusses on strong vigorous plants. The flowers are a pleasing shade of deep rose. $2.50 per doz.; $20.00 per 100.

Souv. de Mme. E. Chantard. The old reliable early pink that everyone seems able to grow. 90c per doz.; $7.00 per 100.

Trophee. Very popular deep carmine-rose. Early. 90c per doz.; $7.00 per 100.

Venture. A superb variety of real merit. If it can be grown as successfully in this country as in Europe it is bound to become a leader. Above the dark green foliage on strong stems are flower trusses of a beautiful deep red color. This is the variety that received a great deal of favorable comment on the maiden voyage of the R. M. S. Queen Mary where it was used extensively in the decoration of this giant liner. We have a limited stock of it and suggest that you give it a trial. $5.00 per doz.; $40.00 per 100.
